

Severe Weather Safety Class!

Do you know what to do

When the skies darken?

Wind picks up?

Lightning increases?

Heavy rain produces flooding?

Outdoor warning sirens sound?

The Colorado severe weather season is only weeks away.

This class will discuss Colorado weather and Colorado weather hazards and give suggestions on how to stay safe from tornadoes, flooding, lightning, hail, and damaging winds. There are also volumes of weather information available to you from several sources including the internet and NOAA Weather Radio. You will learn to quickly get access to forecasts, watches, warnings and advisories.

Prepared and informed individuals/families make resilient communities!

Guest speaker: Bob Glancy, National Weather Service, Boulder, Co.

Who: Anyone interested in personal safety during severe weather
